

KEY BENEFITS

- ✓ Modular design that delivers reliable extraction for today and in the future
- ✓ Compact yet powerful units using proven European filter and fan designs
- ✓ Quiet operation & high efficiency
- ✓ Over 400+ systems installed throughout Australasia in recent years

COMPACT & POWERFULL S-200 FILTER DUST COLLECTOR

THE S-200 FILTERS ARE DESIGNED FOR SMALL AND LOCALISED INTERNAL APPLICATIONS

AVAILABLE IN ONE SIZE: S-200

Available as standard with one plastic bag, the S-200 can typically service up to 2,800 m³/hr. This may equate to a panel saw @ 160 Ø and a CNC @ 250 Ø operating at the same time.

The S-200 has the best performance/cost ratio of any dust collector in its market segment. The quiet operation and high performance of this system ensures high demand & excellent resale value. Trade-in always offered.

The S-200 filter system delivers far more filter area than traditional 'bag machines' resulting in less resistance and more powerful extraction.

Looking for something bigger, check our T-Series Dust Collectors.

QUICK FACTS

- 7.5m³, 8 needle-felt bags
- Dimensions: 1260W, 1270D, 2745H
- Powerful & high performance

TECHNICAL PARAMETERS

- Fan 2880rpm, 2.2kW, 200 Ø inlet
- 1 plastic waste bags
- Typical capacity: 2,800 m³/h (dependant on dust load & system pressure)

ACCESSORIES:

- Outdoor conversion kit
- Above waste bin option
- Floor Cleaning kit for CNC's
- Quick Fit ducting kits/manifolds for all machinery brands
- From 2.2 kW to 7.5 kW options

*Airtight is the preferred supplier for all major wood working machinery suppliers in Australia/NZ
