

KEY BENEFITS

- Clean air fan
- No moving parts within the dirty gas stream
- Differential pressure control, saving power and air consumption
- Precision punch and folded 3mm thick design
- Special inlet technology removes heavy dust prior to filtration

PULSE JET FILTER SYSTEM

THE ALL NEW APMB-SERIES TUBULAR BAG UNIT

TUBULAR BAG UNIT

The new Australian made APM is our latest revision of the proven APM design. The APM design is a proven performer in multiple industrial applications, including mining, powders, minerals, fume and light foundry.

The APM Pulsejet series offer high performance in a small footprint, is expandable and versatile by design with many options available, customisable to suit your application and requirements.

The all new patented inlet technology ensure superior dust separation, long bag life and lowest running cost of comparable products. Oversized cleaning system ensures superior cleaning and low pressure drop. Combining engineered design with modularity offers you unrivaled quality and value for money.

COMMON SIZES & CONFIGURATIONS

Model	APMB 70/100-3000	APMB 100-3000	APMB 200-3000
Filter area m ²	79m ² , 70 Tubular bags	113m ² , 100 Tubular bags	226m ² , 200 Tubular bags
Max Volume	9500m ³ /h @ 2.0ATC	20,000m ³ /h @ 3.0ATC	40,000m ³ /h @ 3.0ATC
Dimensions	2000w x 2400d x 6100-6500h	2400w x 2400d x 6100-6500h	2740w x 2400d x 6100-6500h
Pulse Valves	7 x 25 Series	10 x 25 Series	20 x 25 Series
Diffuser Inlet	n/a	Yes - Single side	Yes - Centre Inlet
Discharge	Bin or Rotary Valve	Bin or Rotary Valve	Bin or Rotary Valve
